

SURE-BOARD

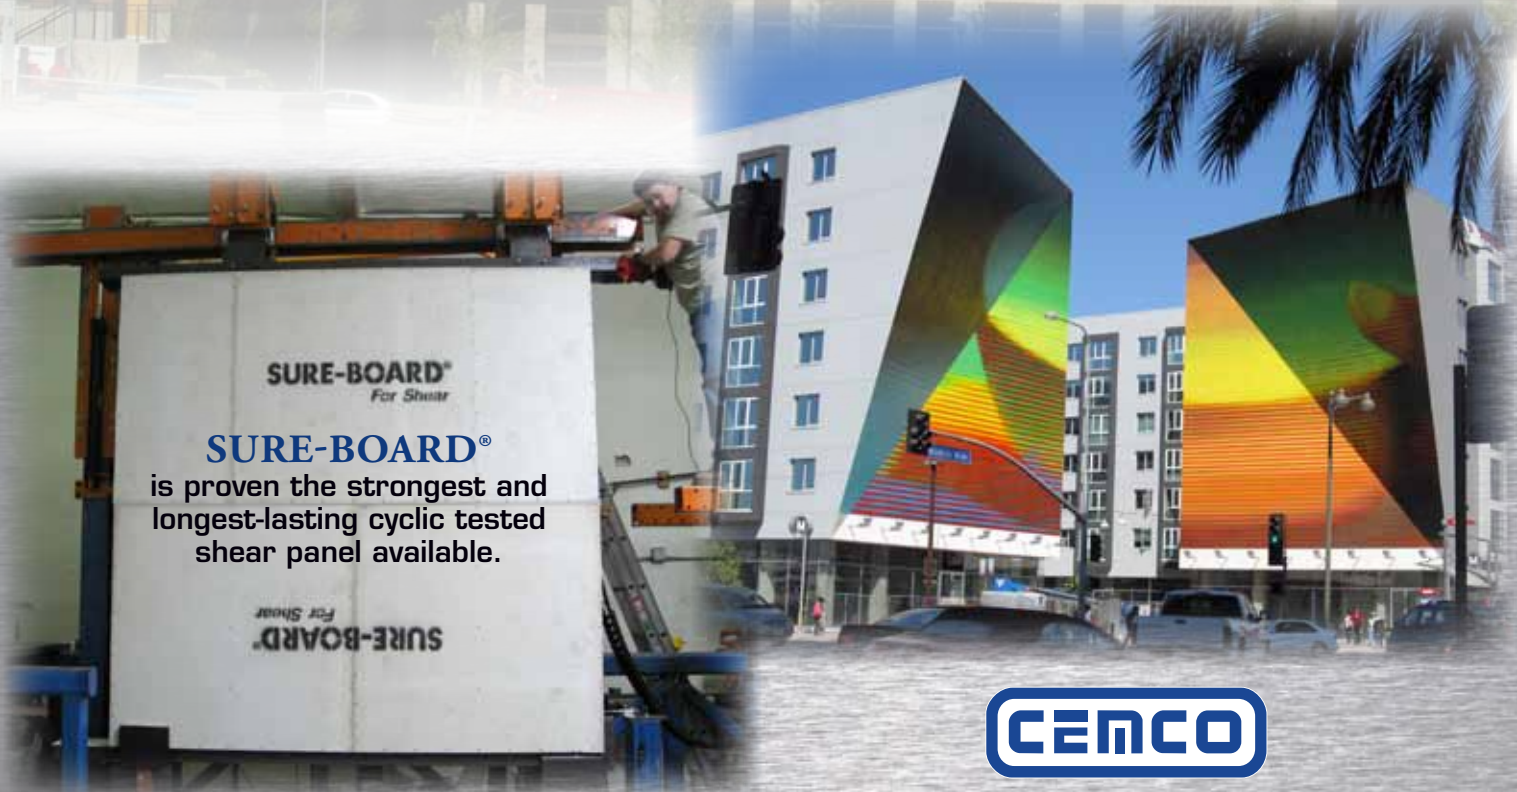

Nationally Manufactured and Approved using the most conservative ASTM E2126-07a (reverse) Cyclic Test Protocol. Our patented panel has been approved using all nationally accepted building codes for over a decade.

## ***THE NEXT GENERATION OF SHEAR PANELS***

**SURE-BOARD®** . . . *for Shear*

Today, designers of both WOOD and CFS framed structures in seismic and hurricane affected areas in our vast nation are now beginning to realize that **Sure-Board®** can also be used to resist terrorist blast and ballistic attack. **Sure-Board®** is the best choice for superior strength, fire resistance as well as all weather protection from infestation and mold. Our shear panels are installed to resist nature's toughest challenges including a resilient steel sheet to resist flying debris. **Sure-Board®** is fast becoming the first choice for shear walls for many of the nation's largest designers and contractors in commercial, institutional, residential and GSA "hardened" facilities.

**SURE-BOARD®**  
is proven the strongest and  
longest-lasting cyclic tested  
shear panel available.

Steel Framing and Metal Lath

TESTED APPROVALS: ICC, IAPMO, Los Angeles City (LARR), DSA, Miami Dade, E119 Standard 1 and 2 Hour Load Bearing fire test approvals, Sound tested to STC 60, Blast tested by the United States Department of State.

**Sure-Board®** is manufactured by CEMCO, a leader in steel technology for construction. Call CEMCO at (866) 469-7432 to make **Sure-Board®** your shear-wall product of choice today! Or visit: [www.cemcosteel.com](http://www.cemcosteel.com) or [www.sureboard.com](http://www.sureboard.com)
